CONTENTS OF VOLUME I, 1969

No. 1, March, 1969

SYMPOSIUM ON THE PHYSIOLOGICAL BASIS FOR HUMAN WORK PERFORMANCE

Physical working capacity and physical performance
Howard G. Knuttgen 1

Respiration in exercise
Gunnar Grimby 9

Circulation
Loring B. Rowell 15

Energy release in the muscle cell
Philip D. Gollnick and Douglas W. King 23

Anaerobic energy release
Lars Hermansen 32

Body temperature during exercise
Jan W. Snellen 39

Exercise under hypoxic conditions
Klaus Klausen 43

Physiologic effects of physical conditioning
Bengt Saltin 50

No. 2, June, 1969

Urinary excretion of immunoglobulins and their subunits in human subjects before and after exercise
J. R. Poortmans and R. W. Jeanloz 57

The effect of training on aerobic and anaerobic metabolism during a short exhaustive run
David A. Cunningham and John A. Faulkner 65

Effects of frequency of training on working capacity, cardiovascular function, and body composition of adult men
Michael L. Pollock, Thomas K. Cureton, and Leonard Greninger 70

The effect of a moderate exercise program on body weight and skinfold thickness in overweight college women
D. L. Moody, J. Kollias, and E. R. Buskirk 75

Energetics of marathon running
David L. Costill and Edward L. Fox 81

The use of actual, predicted and constant residual volumes in the assessment of body composition by underwater weighing
Jack H. Wilmore 87

Influence of a weight training program on quadriceps reflex time
Peter R. Francis and Charles M. Tipton 91

Karate hand-conditioning
James H. Larose and Kim Dae Sik 95

Kappô — an oriental form of resuscitation
Martin L. Norton 99

Quadriceps strain, rupture and charlie horse
Allan J. Ryan 106

Decisions concerning cerebral concussions in football players
Richard C. Schneider and Frederick C. Kriss 112

Contents of Volume 1, 1969 Continued

No. 3, September, 1969

Head and neck injuries in contact sports
George A. Snook 117

Comparison of exercise in air and in water of different temperatures
Albert B. Craig, Jr. and Maria Dvorak 124

Pulmonary diffusing capacity and cardiac output in young trained Norwegian swimmers and untrained subjects
John R. Magel and K. Lange Andersen 131

Correlation of athletic performance with pulmonary function in 13 to 17 year old boys and girls
G. R. Cumming 140

The potential for cardiovascular accidents in athletes with a heart problem
Kenneth D. Rose 144

Incomplete right bundle branch block (Lead V_1) in athletes
Petar J. Mitrevski 152

Changes in maximum work capacity resulting from six months training in patients with ischemic heart disease
F. W. Kasch and J. L. Boyer 156

A comparison of executives with a total population in physical activity and other possible coronary heart disease risk factors
J. A. Faulkner, H. J. Montoye, and G. W. Greey 160

Physical activity at work and active leisure as related to occupation
David A. Cunningham, Henry J. Montoye, Helen L. Metzner and Jacob B. Keller 165

Orthogonal factors and norms for time components of the left ventricle
B. Don Franks, Jack F. Wiley, and T. K. Cureton, Jr. 171

No. 4, December, 1969

Olympics 1968: A post-mortem
Albert B. Craig, Jr. 177

Competitive sports for young boys: controversial issues
G. Lawrence Rarick 181

Personality, achievement in physical competition, physique and grip strength in female physical education students
J. D. Brooke, E. J. Hamely and P. Stone 185

The relationship of strength to body size and typology
Lloyd L. Laubach and John T. McConville 189

Protein dietary supplementation and physical performance
Philip J. Rasch, Jefferson W. Hamby, and H. J. Burns, Jr. 195

The engineering of ski bindings
John O. Outwater and Carl F. Ettlinger 200

A maximal oxygen uptake test during ice skating
R. J. Ferguson, G. G. Marcotte, and R. R. Montpetit 207

Practice curves and errors of measurement in estimating underwater weight by hydrostatic weighing
Frank I. Katch 212

Body fluid volumes of college athletes and non-athletes
David R. Cook, William S. Gualtiere and Stephen J. Galla 217
